

THE ECONOMETRIC SOCIETY ANNUAL REPORTS, 2000

REPORT OF THE SECRETARY

SEATTLE, WASHINGTON  
AUGUST 10, 2000

1. *Status of Membership and Circulation*

THE FIRST SECTION of this report describes the evolution of the Society's membership and of the number of institutional subscribers. Information is provided on members and subscribers on both a mid-year and end-of-year basis. In each case, circulation is "real," tied to actual banked receipts of dues and subscription revenue.

The latest information available, as of June 30 of the current year and of previous years, is provided in the top half of Table I. The bottom half of Table I reports the final number of paid-up members and subscribers as of the end of 1999 and previous years. For any given year prior to 2000, the figures in the bottom half of Table I are larger than in the top half, reflecting those memberships and subscriptions for a given year that are initiated between the middle of that calendar year and the middle of the following calendar year.

Averaging out year-to-year fluctuations, the circulation of *Econometrica* remained quite stable in the 1990s. The full-year figures in the bottom half of Table I show that the average total circulation of *Econometrica* in 1995–99 was just 1.4 percent lower than the average for 1990–94. There was some change within the different categories of circulation. Again comparing 1995–99 with 1990–94, institutional circulation was 2.8 percent lower, regular membership (including soft currency, free, and life) was 4.8 percent lower, and student membership 26 percent higher.

The figures for June 30, 1999, shown in the last line of the top part of Table I, show a substantial decline from the situation on the same date the previous year. The mid-year 2000 measure of total circulation is down by 3.6 percent compared to the 1999 mid-year number and down by 5.4 percent compared to the average of the 1995–99 mid-year figures. Most of this decline has occurred in the regular membership category.

The comparative full-year 1999 figures for the Econometric Society and the American Economic Association are displayed in Table II. (For the membership category these figures include regular, student, free, and life members for both the ES and AEA). The "E/A" ratio for members in 1999 of 0.204 tied the previous year for the highest on record since 1974, while the ratio for institutions of 0.514 was the highest on record. Thus the slippage of membership for the ES is no faster than that of the AEA and for institutions the ES decline is slower.

2. *Geographical Distribution of Members and Fellows*

The geographical distribution of members (including students) is shown in Tables III and IV. This continues to show a striking shift in membership from North America to the other regions. Comparing 2000 with 1991, we note that membership in North America fell by 32.4 percent, a sharp contrast to percentage gains of 10.2 percent in Europe and Other Areas, 169 percent in Latin America, and 17 percent in the Far East. Over the

1997	4,176	21,720	.192	2,514	5,234	.480
1998	4,251	20,874	.204	2,483	5,077	.489
1999	4,080	20,048	.204	2,489	4,838	.514

same period membership was constant in Australasia and declined by 14 percent in the India and Southeast Asia region.

The percentage breakdown of members by region is shown in Table IV. Since 1991 there has been a substantial shift in membership shares from North America to the rest of the world, which might be regarded as a healthy development in strengthening the Society as a genuinely international organization.

The *Aide Memoire* sets a limit of ten Council seats on North America and Europe/Other Areas, and the other regions have Council representation equal to one Council member for every 50 members or "substantial fraction thereof." According to this criterion, the current representation of two Council members for Latin America, one for India/Southeast Asia, four for Far East, and two for Australasia appears correctly to reflect the criterion for Council representation set down in the *Aide Memoire*.

five years (58.6 percent). Table VII displays information on the number of nominees and newly elected Fellows. A total of 13 new Fellows was elected in 1999, well below the average number (18.1) elected in 1989–97 under the present electoral system.

#### 4. Website and Members' Directory

The Econometric Society web site was developed by John Rust and by Dorothy Hodges, managing editor of *Econometrica*, during the first half of 1997. It is located at:

*www.econometricsociety.org*

The web site contains most of the information that regularly appears in the back of *Econometrica*, including Calls for Papers and final Programs. Another feature is a detailed introduction to the history and organization of the Econometric Society; this was published in *Econometrica* in November, 1997, and the web version is updated regularly. In addition, most program chairs have organized their meetings through the web, substantially reducing the cost and effort of routine communications. John Rust has been developing "Conference Maker" software that will provide a set of templates that will

allow all future organizers of regional meetings and of the World Congress to administer their meetings on the web without the need to develop new methods and software each year. Peter Cramton and Larry Ausubel, the organizers of the North American Summer Meetings in 2001, are currently testing the software. Currently some of the regional meetings, as well as the 2000 World Congress, provide pdf versions of papers on their web sites and/or links to authors' web sites. Planning is now underway to create an archive on the Society's web server of all papers available electronically for any of the Society's regional meetings and its World Congress.

The web site also provides recent and future Tables of Contents of *Econometrica*. Links are included from the Tables of Contents on the Society's web site to the personal web sites of authors.

An electronic Member's directory went "live" at the end of July, 2000. This allows anyone, members and nonmembers alike, to search for details on any member. Members in turn are encouraged to amplify and update their own entries to include statements of research interests and links to their own web sites—members are able to access and alter their own entries on a password-protected basis.

#### 5. *Meetings*

The next meetings of the Econometric Society are scheduled as follows:

North American Winter Meeting, New Orleans LA, January 5–7, 2001

North American Summer Meeting, University of Maryland, June 21–24, 2001

Australasian Meeting, Auckland, New Zealand, July 6–8, 2001

Far East Meeting, Kobe, Japan, July 20–22, 2001

Latin American Meeting, place and exact date to come, August, 2001

European Meeting, Lausanne, Switzerland, August 26–29, 2001

North American Winter Meeting, Atlanta GA, January 4–6, 2002

#### 6. *A Final Note*

My special thanks go to Maryann Semer, who has just passed her eleventh anniversary with the Society, as well as the following two Northwestern students—Jonathan Eller and Yow-Yow Chen—for their help over the past academic year and summer.

JULIE P. GORDON  
*Secretary*
